ACADEMIC PROJECTS

- LEXISHIFT : Lexishift is a dyslexia-friendly PDF converter designed to enhance accessibility for individuals with dyslexia. This web-based tool allows users to upload PDF files and convert them into dyslexia-friendly formats with customizable text and layout options. 📄 ⚡
- Robolu: A simple Bluetooth-controlled rover powered by an ESP32/ESP8266, letting you control its movements wirelessly from your phone. It's a fun and easy project to explore robotics and wireless communication! 🚗 🚗
- Skin Cancer Detection : A machine learning-based project for detecting skin cancer from images, aiming to assist in early diagnosis. Upload an image, and the model predicts whether the lesion is benign or malignant.
- Todo :A clean and easy-to-use to-do list app made with HTML, CSS, and JavaScript. Stay on top of your tasks by adding, editing, or deleting them effortlessly!
- Rock Paper Scissors : A fun rock-paper-scissors game built with HTML, CSS, and JavaScript. Play against the computer and see who wins — perfect for a quick break!
- Portfolio Website : A stylish and interactive portfolio website created with React, Tailwind CSS, and Framer Motion.
- Snakey : A classic Snake game made with Python using the Turtle module.
